

SOLUTIONS

Bags created so far:

Bag Type	ID	Container
Carry	1001	
Proof	2001	1001

AS Receive™ documents your receipt of every package and quantifies actual check volume for capacity planning.

AS Receive™

Closed Loop Tracking Drives Management of Item Processing

- AS Branch Origination™ provides the branch the ability to create electronic bills of lading for shipping important documents, cancelled checks and deposits
- AS Transit™ collects the stop ID, bag type and ID, time, date and even signature information from each stop
- AS Receive™ completes the track and trace process by matching expected bags to those delivered
- Web based reporting for on time performance and received volume analysis
- AS Receive™ requires an HTTP Protocol Network Port Connection, Microsoft Internet Explorer v 6.0 or better, USB or Serial connection with the scale and barcode scanner. Check with your BeavEx representative for specific technical requirements and scale compatibility for your facility
